Subject: KSIS Notification: New Infinite Campus Release and Planned Infinite Campus Outage Notice

Dear KSIS Contacts-
This is an advanced notice that KDE is targeting the release of **E.1250.2** to all Kentucky Infinite Campus production and sandbox environments starting on Wednesday evening **January 9,** at 5 p.m. local time. The *highlights* of the release include the areas listed in the table below. You will experience some Campus down time during the update process. Release notes are attached. Please notify Campus users in your district accordingly.
With the deployment of E.1250 we are also deploying E.1246. The Infinite Campus release, E.1246 contained a major change to the way Security Administration is handled. The E.1246 was not deployed in December to ensure there would not be system interruptions when districts were posting grades for end of the semester.
If you would like additional information on the highlights of the E.1250 release or E.1246 please view one of two recorded WebEx sessions (at no additional cost):
